

FIRST AID WORKSHOPS

This week, children in Year 1 to Year 6 completed a First Aid workshop which was funded by the PTA.

In the workshops the children learnt how to deal with bumps, burns, breaks and bleeding, carry out CPR and a choking incident. The sessions were practical and gave the children a hands-on experiences.

This was a fantastic opportunity for the children to learn key life skills and to become more aware about how they can help others, be more independent and support those in need.

This week's focus – Energy Drinks

This information guide looks at high-caffeine energy drinks; their possible health risks; and how to address these potential issues..

IMPACT ON MENTAL HEALTH

The significant levels of caffeine and sugar in energy drinks can exacerbate anxiety, nervousness and even – in susceptible individuals – contribute to panic attacks. Additionally, the crash that often follows the initial energy boost can actually make mood swings worse and possibly lead to feelings of depression and irritability.

POTENTIAL FOR DEPENDENCY

Frequent consumption of energy drinks can lead to tolerance – meaning that individuals may need to consume increasing amounts to continue achieving the desired effects. This can potentially lead to dependency and addiction, especially in younger individuals who may be more vulnerable to addictive behaviours.

DISRUPTED SLEEP PATTERNS

Consuming energy drinks, especially during the afternoon or evening, can disrupt normal sleep patterns. The stimulating effects of caffeine can make it difficult for children and young adults to fall asleep – leading to insufficient rest and its associated health risks, including impaired cognitive function, mood disturbances and decreased academic performance.
